Mature with rich functions: solutions are deployed in 6
Asian countries supporting all currencies, languages
and taxation

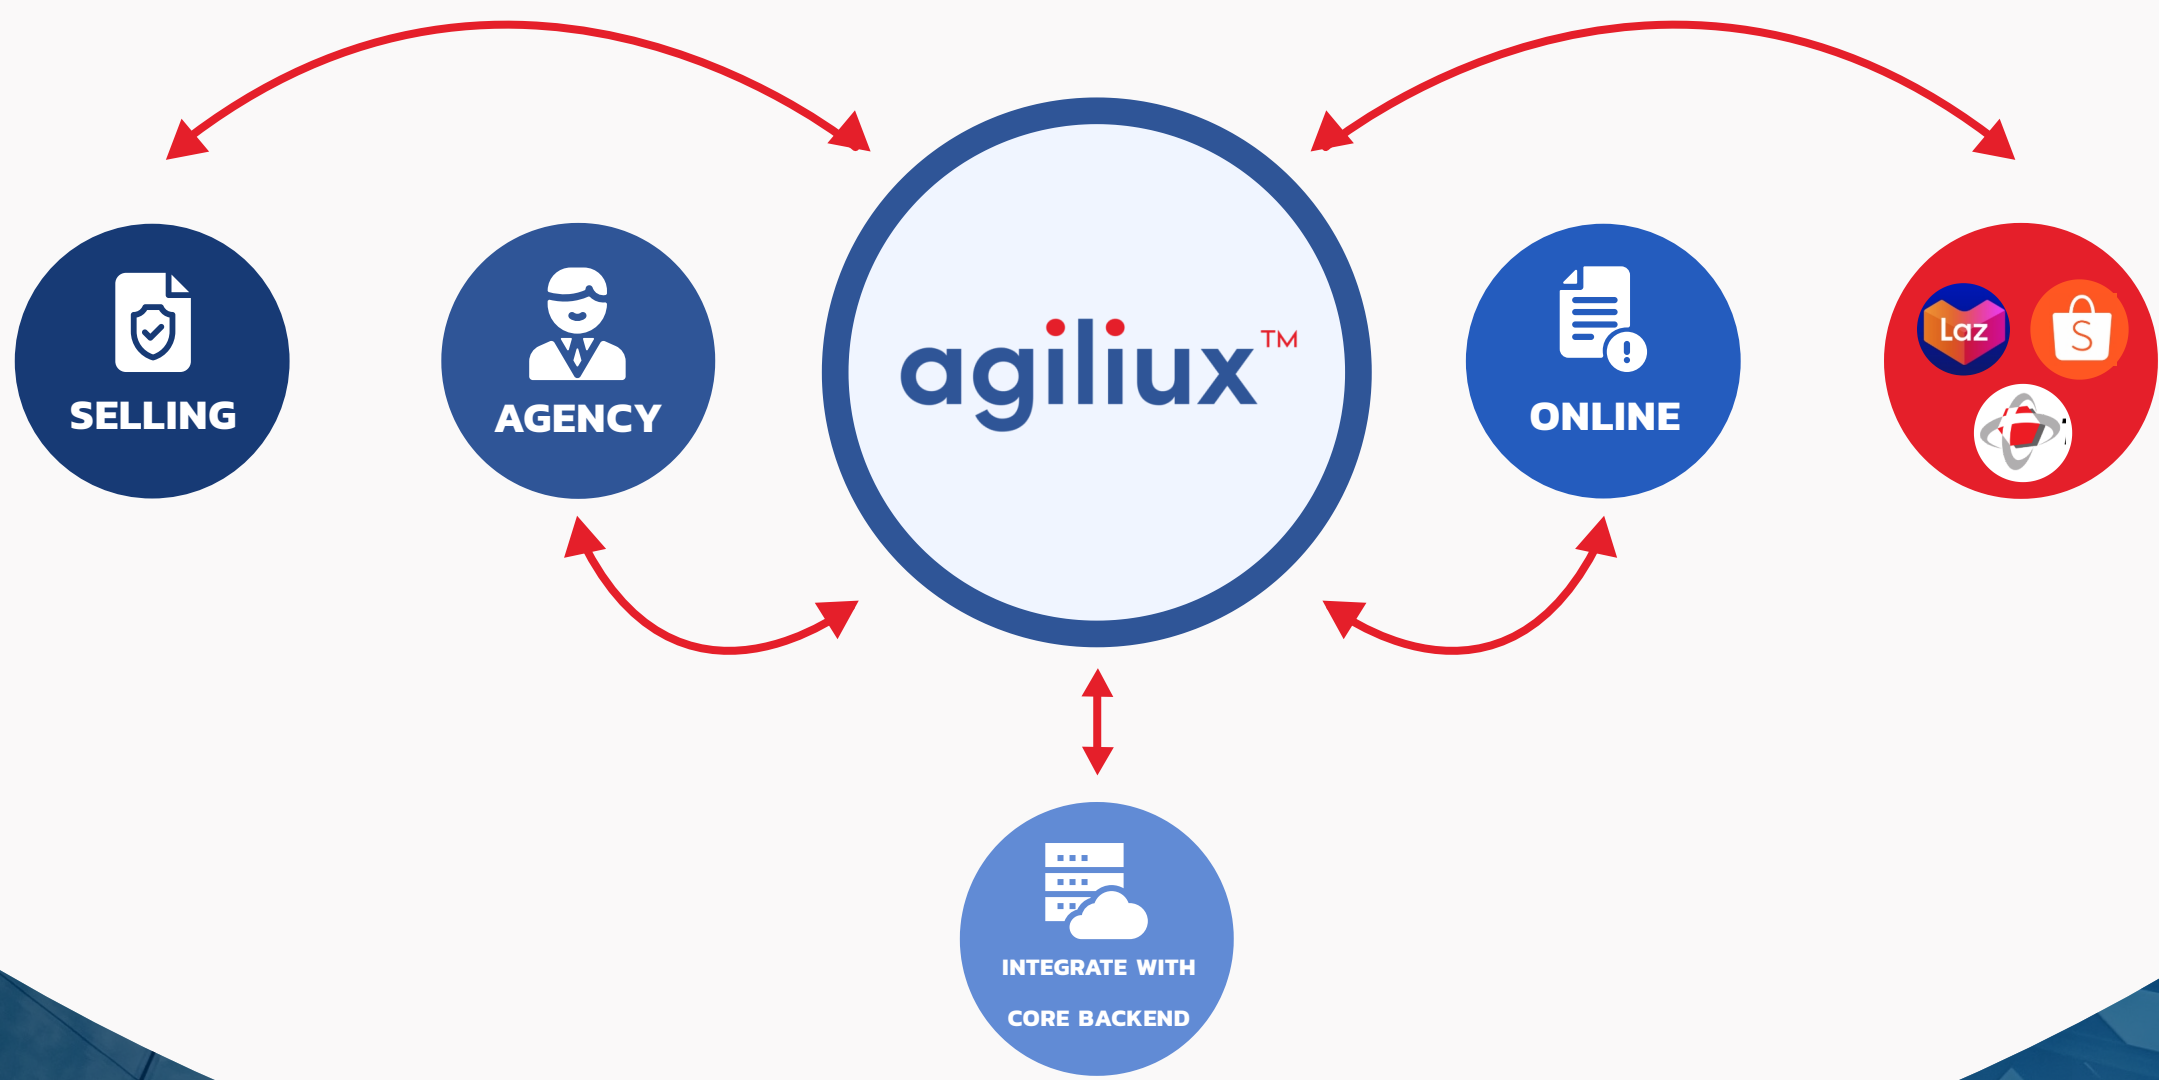

AGILIUX, AT A GLANCE

Agiliux is a cloud-based product for the insurance industry that assists insurance intermediaries in overcoming 3E challenges in digital insurance. Agiliux Cloud Insurance, Agiliux Cloud Applications, and SaaS for Intermediaries influenced the product development.

AGILIUX CLOUD INSURANCE

Agiliux is a Software-as-a-Service that provides insurance professionals with an end-to-end workflow and management platform.

Agiliux is a development and connectivity platform for fast innovations required by insurance companies and intermediaries with key components including product engines, broking process, microservices for policy, claims, payment and so on. Agiliux is primarily designed for Open API collaboration and managed on AWS on Google Cloud. We work with our cloud providers and all our servers meet the latest industry and cloud standards for security, regularly audited by external security firms.

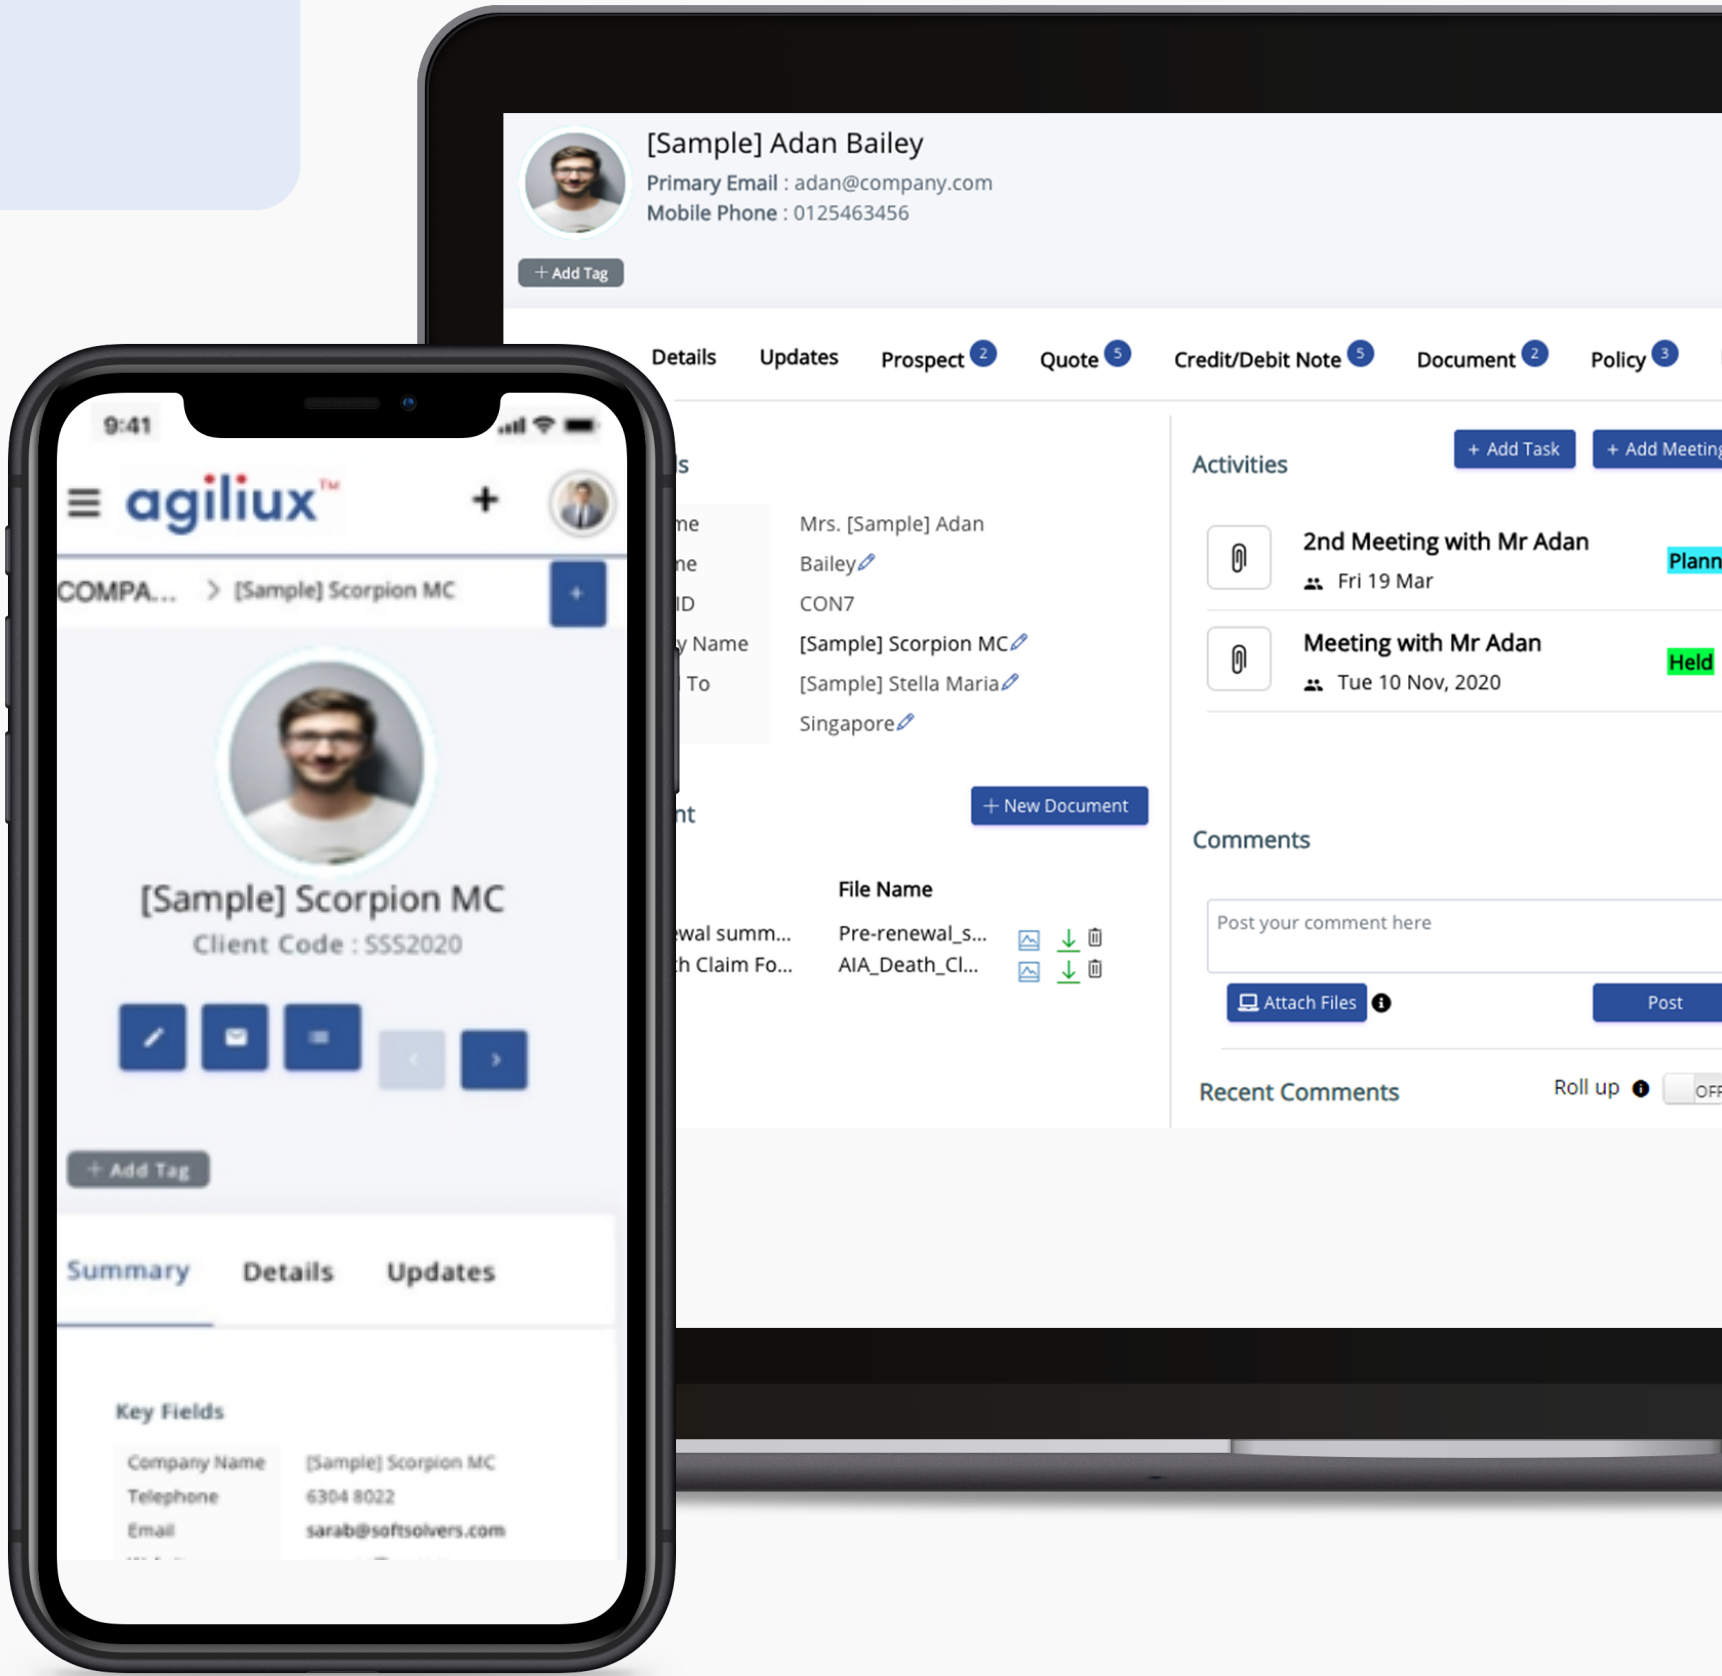

AGILIUX CLOUD APPLICATIONS

Agiliux Mobile is a fully functioning app for insurance companies or brokers to handle all aspects of insurance sales with payment gateways and claims submission.

Agiliux Policy Portal is a personal and commercial products distribution platform for brokers and intermediaries to sell products from multiple insurers. Manage real time sales, quotations and policy issuance to your customers.

Agiliux Claims Portal is a self-service application for policy holder’s to instantly report claims, upload documents and track approval status till settlement.

“With Agiliux Cloud Applications, customers now can access into Agiliux Policy & Claims Portal through tablets or smartphones anywhere, anytime”

SAAS FOR INTERMEDIARIES

Insurance Broker Software enables brokers to automate client services, broking process, claim submission and improve financial compliance.

Insurance Agency Software helps agencies grow their business with an industry specific CRM, commissions processing and sales automation.

Insurance CRM Software offers multi-channel customer engagement with intelligent campaigns, helpdesk ticketing and auto alerts to build lasting relationships.

WHY AGILIUX

Global Solution: A digital connectivity platform for global and regional teams with multiple currencies, tax rates, languages and regulatory requirements.

Digital Transformation: Seamlessly connect your legacy systems to offer cutting edge digital solutions, without disrupting the existing infrastructure and processes.

Cloud Insurance: With SaaS, upgrades are applied continuously without waiting for your IT staff and give full value from your software investment.

Fair Pricing: Start small with what you need and add more advanced features as you grow and ready to scale. Never pay for what you don't use.

Transparency: You will be provided with weekly project reviews and status updates at every stage of the project development.
